ARNOLD SCHWARZENEGGER
Governor

Dear Sun Safety Tool Kit Recipient,

Thanks for your interest in protecting outdoor workers from skin cancer.

The purpose of the kit is to increase awareness and the practice of sun-safety behaviors among outdoor workers. The tool kit is meant to be a comprehensive resource to use for your specific education and training needs.

As a Sun Safety Tool Kit user, you are part of a Statewide effort to educate outdoor workers and their employers about the importance of sun safety, and we need your help! A strong feedback loop between our office and the users is critical to the ongoing success of the program. This feedback loop will provide you with the opportunity to let us know how you are using the materials, how the curriculum can be strengthened to more closely meet your needs, and how we can provide you with the assistance and support you may want with your training. Your suggestions and comments will enable us to modify the kit to suit your needs and to provide you with additional resource materials and/or training assistance.

This Sun Safety Tool Kit was provided to your organization free of charge. Please help us continue this service by completing and returning the Trainer Activity Report and Evaluation Forms after the training is finished. Instructions for faxing, mailing, or completing online, are included on the instruction sheet. Thank you in advance for your participation in this process. Your feedback will allow us to track usage of the kit for reporting purposes, make revisions as necessary, help ensure continuation of the program, and log your contact information so you can quickly receive any updates to the materials.

We hope that you find the kit useful in your training and education activities with your employees. We look forward to hearing from you. Please feel free to contact the program at 916.779.2611 if you have any questions.

Best regards,

Dawn Nozicka-Ferris, MHSE, CHES
CA Skin Cancer Prevention Program
Program Manager
