Moderated by Lloyd Smith, MD, PhD

COURSE OBJECTIVES

After viewing this course, participants should be able to:

1. Discuss new information on symptoms in patients developing ovarian cancer.
2. Develop a clinical approach to diagnosis and testing in women with suspicious symptoms.
3. Evaluate diagnostic options for patients with suspicious symptoms.
4. Recognize the significance of family history in determining susceptibility to ovarian cancer.
5. Evaluate how the medical system responds to system complaints described by ovarian cancer
